Data Privacy & PII Protection

Last updated: June 21, 2026

EduGears AI is built for classrooms and the sensitive information they handle. This page explains what personally identifiable information (PII) we process, why, and the controls that keep it safe — a student-data-focused companion to our full Privacy Policy.

1. Personal Data We Process (PII)

EduGears AI processes the minimum personal data needed to deliver AI tools inside your LMS: a user's name, email, role (teacher or student), and the user and course identifiers your LMS passes through LTI 1.3. We also store the content created or submitted within the tools — generated resources, question banks, student submissions, and tutor conversations. Your LMS administrator stays in control of what is shared: you can configure your LMS to restrict or withhold student names and email addresses if your institution requires it, and EduGears AI will operate using the LMS-provided identifiers alone.

2. Data Minimization & Purpose Limitation

We collect only what a feature needs, and use it only to provide that feature. We never sell personal data, never build advertising profiles, and never use student data for any purpose beyond delivering the service you launched from your LMS. By default, files you upload (such as source PDFs or notes used to ground AI generation) are deleted the same day. The one exception is files uploaded for question generation, which are kept for one week so you can generate more questions from the same source. A portal administrator can adjust these retention settings if your institution requires it.

3. How Student Data Is Protected

All data is encrypted in transit with TLS 1.3 and at rest with AES-256. Access is isolated per institution using Row Level Security, so one school can never see another's data. Administrative access is least-privilege and audited.

4. AI Providers & Your Data

When a tool calls an AI model — OpenAI, Anthropic, Google Gemini, DeepSeek, or Sarvam AI — only the content needed for that request is sent, over encrypted channels. Student data is never used to train third-party models. Institutions can also Bring Your Own Key (BYOK) so AI requests run entirely under their own provider account. Any AI provider key you add (BYOK) is always encrypted at rest and is only decrypted in memory for the moment a request is sent — never stored in the clear or logged.

5. FERPA, COPPA & GDPR Compliance

EduGears AI acts as a school official and service provider under FERPA, processing student records solely to perform the functions your institution authorizes. For students under 13 we rely on school consent under COPPA, and we support GDPR data-subject requests for institutions in scope. A Data Processing Agreement is available on request.

6. Retention, Deletion & Data Residency

Personal data is kept only as long as your institution uses the service or as needed to provide it. Administrators can delete content at any time, and we honor verified deletion requests — including a same-day purge on request. By default, your data is hosted in the USA. Regional deployments for the UK and India are available on request to keep data in-region, and we consider additional regions on request.

7. Your Rights & Choices

Institutions and their users can access, correct, export, or delete the personal data we hold. Requests are routed through your institution's administrator to verify identity and authority. BYOK and per-institution controls let you tighten data handling even further. A current list of sub-processors is available on request.

8. Contact Us

Questions about how we handle PII, or need a Data Processing Agreement or sub-processor list? Email us at support@edugears.ai and we'll respond promptly.

Privacy Policy

Last updated: May 31, 2026

1. Overview

EduGears AI LTI is an AI-powered educational tool platform that integrates with Learning Management Systems (LMS) via the LTI 1.3 standard. This Privacy Policy explains what data we collect, how we use it, how we protect it, and your rights as a user or institutional administrator. We are committed to handling all personal and institutional data with transparency, care, and full compliance with applicable data protection laws.

2. Information We Collect

We collect only the minimum data required to provide the EduGears AI LTI service. Through the LTI 1.3 launch, we receive: your name, email address, LMS role (admin, instructor, or student), and course context (course ID and title). We also collect LTI session logs including user identity, role, timestamp, course context, and launch origin. When you use AI-powered features, we store the prompts submitted, AI responses generated, grading outputs, and any errors that occur. We do not collect LMS credentials, passwords, or any data beyond what is required to deliver the features you use.

3. How We Use Your Information

We use the data we collect to authenticate you through your LMS, deliver AI tools and features within your course context, pass grades back to your LMS gradebook when AGS is enabled, improve reliability and diagnose errors, and communicate with institutional administrators about service updates. We do not sell your personal information to third parties. Your data is never used to train AI models by EduGears AI or any of our AI provider partners.

4. Data Storage and Retention

All data is stored and processed on secure cloud infrastructure. Submission data — including audio recordings, video, images, and PDFs submitted for AI processing — is purged the same day after processing is complete. Documents uploaded for question generation are retained for up to 7 days and then permanently deleted. LTI session logs and AI interaction logs are retained for operational purposes and deleted on a rolling schedule. Institutional administrators may contact us to request earlier deletion of their institution's data.

5. Security Architecture

EduGears AI LTI is built with a security-first architecture. All data in transit is encrypted using TLS 1.3. All data at rest — including API keys, submissions, and user records — is encrypted using AES-256. Multi-tenant data isolation is enforced at the database engine layer through Row Level Security (RLS): each institution's data is architecturally separated, making cross-tenant data access impossible by design, not just by policy. No EduGears AI staff have direct access to tenant data; all access is mediated programmatically through the application and scoped to the appropriate tenant. Role-based access control (RBAC) enforces distinct permissions for admin, teacher, and student roles within each institution.

6. AI Providers and Bring Your Own Key (BYOK)

EduGears AI LTI integrates with third-party AI providers including OpenAI, Anthropic (Claude), Google (Gemini), DeepSeek, and Sarvam AI to power its AI features. When using EduGears AI-managed AI access, your data is transmitted to the selected provider solely to fulfil your request and is not shared further or used for model training. If you use the Bring Your Own Key (BYOK) option, your API key is encrypted at rest using AES-256 and used exclusively to make requests to your chosen provider on your behalf. You remain responsible for your provider's terms of service and any usage costs incurred under your key.

7. LTI 1.3 Security and Authentication

Authentication is handled entirely through your LMS via the LTI 1.3 Advantage standard. We use RSA key pairs and JSON Web Tokens (JWT) for cryptographic authentication, an OpenID Connect (OIDC) handshake to establish trusted sessions, and nonce and timestamp validation to prevent replay attacks. We never receive, store, or transmit your LMS login credentials. The data passed at launch is limited to what your LMS provides in the LTI claims: name, email, role, and course context. EduGears AI LTI also supports Moodle's anonymised launch mode for institutions requiring additional student privacy controls.

8. FERPA and COPPA Compliance

EduGears AI LTI is compliant with the Family Educational Rights and Privacy Act (FERPA) and the Children's Online Privacy Protection Act (COPPA). We act as a school official under FERPA, using student education records only for the purposes for which they were provided. We do not disclose student data to third parties except to AI providers as necessary to deliver the service. We do not knowingly collect personal information from children under 13 outside of an institutional educational context. Institutional administrators are responsible for ensuring appropriate authorisations are in place for student use. A Data Processing Agreement (DPA) is available for institutional partners upon request.

9. Your Rights

Institutional administrators may request access to, correction of, or deletion of their institution's data by contacting support@edugears.ai. Students and instructors should direct data requests through their institutional LMS administrator. You may withdraw your institution's customer reference consent at any time by emailing us. Where applicable law provides additional rights — such as under GDPR or applicable Indian data protection law — we will honour those rights within the timeframes required.

10. Contact Us

If you have questions about this Privacy Policy, wish to request data deletion, or need a Data Processing Agreement, please contact us at support@edugears.ai.

Terms of Service

Last updated: August 11, 2026

1. Acceptance of Terms

By accessing or using EduGears AI LTI, you agree to be bound by these Terms of Service. If you do not agree to these terms, please do not use our services. These Terms apply to all users, including institutional administrators, instructors, and students.

2. Use of Service

EduGears AI LTI provides AI-powered educational tools integrated into your Learning Management System via the LTI 1.3 standard. You may use our services for lawful educational and training purposes in accordance with these terms. You agree not to misuse the service, attempt to access systems or data you are not authorized to access, or use the service to generate unlawful, harmful, or abusive content.

3. Institutional Registration

Authentication is handled through your LMS via LTI 1.3. Institutional administrators are responsible for registering EduGears AI LTI within their LMS and managing access for instructors and students. By registering your institution's LMS with EduGears AI, the registering administrator represents that they have the authority to bind the institution to these Terms.

4. Customer Reference

By registering your institution's LMS with EduGears AI LTI, you grant EduGears AI the right to identify your institution by name as a user of the EduGears AI platform in our marketing materials, website, and other promotional content. We will not use your institution's logo or imply a formal endorsement or partnership without separate written consent. You may withdraw this consent at any time by contacting support@edugears.ai.

5. Intellectual Property

Content you create using EduGears AI LTI — including AI-generated questions, assessments, slides, and study materials — remains your property. The EduGears AI LTI platform, including its technology, branding, and features, is the property of EduGears AI LLC. You may not copy, modify, or distribute our platform or its components without written permission.

6. Grade Passback

When grade passback (LTI AGS) is enabled, EduGears AI LTI will automatically submit grades to your LMS gradebook. Instructors are responsible for reviewing AI-generated grades before final submission to students. EduGears AI is not responsible for grading outcomes or academic decisions made based on AI-generated scores.

7. Privacy and Data Protection

EduGears AI LTI is FERPA and COPPA compliant. We collect only the minimum information required for authentication through LTI claims (name, email, course context, and role). All data is encrypted in transit and at rest. We do not store LMS credentials, and student content is never used to train AI models. We do not sell personal data to third parties. For full details, see our Privacy Policy.

8. AI Providers and Bring Your Own Key

EduGears AI LTI integrates with third-party AI providers including OpenAI, Anthropic, Google, DeepSeek, and Sarvam AI. If you use the Bring Your Own Key (BYOK) option, your API key is used solely to make requests to your chosen provider on your behalf. You are responsible for compliance with your AI provider's terms of service and for any costs incurred.

9. Payment and Credits

EduGears AI LTI offers a free plan with a limited AI credit allowance for evaluation; on the free plan, all AI usage, including text-based course creation, is metered against that allowance. Paid plans are licensed by instructor seat and include text-based course creation without a credit allowance to track, subject to the fair use terms below. On every plan, advanced AI features (including image generation, AI grading of submissions and projects, AI-graded questions, AI Tutor, AI Assistant, Reflections feedback, and Cog Insights) consume AI credits; on paid plans, additional AI credit packs may be purchased, and on any plan you may instead connect your own provider key (BYOK). All payments are processed securely. Fees and credits are non-refundable except where required by applicable law, but purchased AI credit packs do not expire. We reserve the right to change pricing with reasonable advance notice.

10. Fair Use

Learner accounts are included at no additional cost and without a fixed cap on every plan. Plans are licensed by instructor seat, and the number of seats your institution needs is the greater of (a) the number of instructors using the service and (b) one seat per 100 enrolled learners. This free-learner allowance is intended for normal educational and training use by a single institution and is subject to fair use. On paid plans, text-based course creation is included in your subscription and is not metered against a credit allowance; it remains subject to this fair use clause. Advanced AI features consume AI credits on every plan, as described in section 9. We may contact you to discuss a more suitable plan, apply reasonable rate limits, or take other proportionate measures if usage is automated or abnormal, materially exceeds what is typical for a plan of your size, including where your enrolled learners exceed the seats on your plan under the ratio above, places a disproportionate load on our infrastructure relative to your subscription, or involves reselling or sharing access beyond your institution. Except where immediate action is required to protect the service or other customers, we will give reasonable advance notice before taking any measure that affects your access.

11. Disclaimer of Warranties

EduGears AI LTI is provided "as is" and "as available" without warranties of any kind, express or implied. We do not warrant that the service will be uninterrupted, error-free, or completely secure. AI-generated content may contain inaccuracies and should be reviewed by qualified educators before use.

12. Limitation of Liability

To the maximum extent permitted by law, EduGears AI LLC shall not be liable for any indirect, incidental, special, consequential, or punitive damages arising from your use of the service. Our total liability to you for any claims arising under these Terms shall not exceed the amount you paid to EduGears AI in the twelve months preceding the claim.

13. Termination

We reserve the right to suspend or terminate your access to EduGears AI LTI at any time for violation of these Terms or for any other reason with reasonable notice. You may terminate your use of the service at any time by removing the LTI registration from your LMS.

14. Governing Law

These Terms are governed by the laws of the State of Delaware, United States, without regard to conflict of law principles. Any disputes shall be resolved in the courts of Delaware.

15. Changes to These Terms

We may update these Terms from time to time. We will notify registered institutions of material changes by email or via a notice on the platform. Continued use of the service after changes take effect constitutes acceptance of the revised Terms.

16. Contact

For questions about these Terms of Service, contact us at support@edugears.ai.
