1. Who we are

GoGrade AI is operated by DevsTree IT Services Private Limited, located at B - 433-442, Money Plant High Street, Near Ganesh Glory, Jagatpur Road, S.G. Highway, Ahmedabad - 382470, India. For privacy requests, contact support@gograde.ai.

For institutional deployments, your school or organisation typically acts as the data controller for student and academic records. We generally act as a processor / service provider processing data on the institution's instructions to deliver the Services.

2. Information we collect

Depending on how you use the Services, we may process:

Account and contact data: name, email, phone, role, school name, branch, and authentication data.

Institutional profile data: school details, seats, academic structure (years, standards, divisions, subjects), and licence/onboarding information.

Student and parent data uploaded or created by the institution: identity details, academic identifiers, relationship links, and profile information.

Assessment content: question papers, answer keys, rubrics, answer-sheet files (including scans/PDFs), scores, overrides, comments, and report cards.

Usage and technical data: device/browser information, IP address, logs, credit consumption, and support tickets.

Payment-related data: payer name/email/phone, transaction references, amounts, and status from our payment partner (for example, Cashfree). We do not store full card details on our servers when payments are completed through the payment partner's hosted pages/links.

Marketing/enquiry data submitted via demo or contact forms.

Cookies and analytics data if you use our marketing site (for example, Google Analytics / Tag Manager where enabled).

3. How we use information

Provide, operate, secure, and improve AI evaluation, marking workflows, analytics, and report cards.

Authenticate users, manage roles, and isolate tenant workspaces.

Allocate and track credit usage and process payments/invoicing-related records.

Send service emails (invites, password setup, payment links, operational notices).

Respond to support requests and investigate abuse or security incidents.

Comply with legal obligations and enforce our Terms.

With appropriate consent or legitimate interest, send product updates or respond to demo enquiries.

4. AI processing

Answer sheets and related assessment materials may be processed by AI systems (including third-party model providers such as Google Gemini where configured) to extract answers and suggest scores against your answer key/rubrics.

Institutions should avoid uploading data not needed for evaluation. Teachers may review and override AI outputs. We design workflows so institutions retain human control over final grades.

5. Legal bases (where applicable)

Where data-protection laws require a legal basis (for example, India's Digital Personal Data Protection Act, 2023, or GDPR for applicable users), we rely on one or more of: contract performance, legitimate interests (secure operation and product improvement), consent (where required), and legal obligation.

6. How we share information

We may share information with:

Subprocessors needed to run the Services (hosting/object storage such as Google Cloud Storage, email/SMTP providers, AI model providers, analytics, and payment processors such as Cashfree).

Your institution's authorised users according to role permissions.

Professional advisors or authorities when legally required.

A successor entity in connection with a merger, acquisition, or corporate reorganisation, subject to appropriate safeguards.

7. International transfers

Data may be processed in India and in other countries where our subprocessors operate. We take reasonable contractual and organisational measures appropriate to the risk and applicable law.

8. Retention

We retain personal and assessment data for as long as needed to provide the Services to the institution, meet legal/accounting requirements, resolve disputes, and enforce agreements. After offboarding, we delete or anonymise tenant data within the contract term plus 90 days, unless a longer retention is required by law or agreed in writing.

9. Security

We use administrative, technical, and organisational measures designed to protect data, including encryption in transit (TLS), encryption at rest (enabled by default on Google Cloud), access controls, multi-factor authentication for administrator accounts, tenant isolation, and audit logging for platform operations. No method of transmission or storage is fully secure; institutions should apply least-privilege access and strong credentials.

10. Children's data

GoGrade AI may process children's/students' data when provided by educational institutions for academic evaluation. Institutions are responsible for ensuring they have the right to upload and process such data. We do not knowingly market directly to children.

11. Your rights

Depending on applicable law and your role, you may request access, correction, deletion, or withdrawal of consent. Students and parents should typically contact their institution first. You may also email support@gograde.ai. We may need to verify identity and coordinate with the relevant institution before acting on requests that affect institutional records.

12. Cookies

Our marketing site and application may use essential cookies for authentication and security, and optional analytics cookies where configured. You can control cookies through your browser settings.

13. Changes

We may update this Privacy Policy periodically. The "Last updated" date will change when we post revisions. Material changes may be communicated through the Services or email where appropriate.

TrustSecurity & Data Protection

Your institution's data,

protected by design.

GoGrade AI is built to keep student and assessment data private, isolated, and secure — so schools, colleges, and coaching institutes can evaluate with confidence.

Tenant Isolation

Every institution runs in a dedicated, isolated workspace (separate database schema and subdomain). One school can never access another school's data.

Encryption Everywhere

Data is encrypted in transit with TLS and encrypted at rest by default on Google Cloud — covering answer sheets, scores, and student records.

Role-Based Access & MFA

Granular roles (admin, teacher, student, parent) ensure users see only what they should. Administrator and platform accounts are protected with multi-factor authentication.

AI With Human Oversight

AI evaluation is assistive. Teachers review and can override every score. Assessment content is processed to generate results and is not used to train external AI models.

Trusted Infrastructure

Hosted on Google Cloud Platform (GCP) with managed, industry-standard infrastructure. Payments run on Cashfree's hosted checkout — we never store card details.

Audit & Accountability

Platform actions are logged for traceability. Any support access is controlled and recorded, giving institutions clear accountability.

How we handle your data

1

Collection

We collect only what's needed for evaluation — answer sheets, question papers, rubrics, scores, and student identifiers provided by your institution.

2

In transit

All data moves over encrypted TLS connections.

3

At rest

Stored on Google Cloud with encryption at rest enabled by default, within isolated per-tenant storage.

4

Processing

Answer sheets are processed by our AI pipeline to extract answers and suggest scores against your answer key. This content is not used to train external AI models.

5

Retention

We retain institutional data for the contract term plus 60 days, unless a longer period is required by law or agreed in writing.

6

Deletion & offboarding

On request or at offboarding, we export and then delete or anonymise your tenant data within the defined retention window.

Compliance & standards

We follow industry-standard security practices and align our processing with applicable data-protection law.

India DPDP Act, 2023

We align our data handling with India's Digital Personal Data Protection Act. Your institution acts as the Data Fiduciary (controller); we act as a Data Processor handling data on your instructions.

Data Processing Agreement (DPA)

We can sign a DPA that sets out roles, security obligations, subprocessors, and data-handling commitments for your institution.

GDPR (where applicable)

For institutions or users in scope of GDPR, we support processing on a lawful basis with appropriate safeguards.

ISO/IEC 27001 (on roadmap)

We are working toward formal information-security certification as we scale. We do not claim certifications we have not yet achieved.

Need a security review or DPA?

We're happy to walk your IT and procurement teams through our security posture and sign a Data Processing Agreement. Reach out and we'll help.

03 | Terms of Use

https://gograde.ai/terms

Webpage text snapshot | Retrieved 10 October 2026

1. About GoGrade AI

GoGrade AI is an AI-powered assessment and evaluation platform for educational institutions. It helps schools, colleges, coaching centres, and similar organisations upload answer sheets, evaluate responses using institution-defined answer keys and rubrics, review AI-suggested scores, publish report cards, and generate assessment insights.

The Services are provided on a multi-tenant basis. Each institution receives a dedicated workspace (for example, a school subdomain) with controlled access for school administrators, branch administrators, principals, teachers, students, parents/guardians, and other authorised roles.

2. Who may use the Services

The Services are intended for authorised representatives of educational institutions and their invited users. You must be legally capable of entering into a binding agreement and must have authority to bind your institution where you accept these Terms on its behalf.

Students and parents may access limited features (such as published report cards) only when invited or enabled by their institution.

3. Accounts, access, and security

You must provide accurate registration and profile information.

You are responsible for safeguarding login credentials and for activity under your account.

Institutions must ensure that only authorised staff, students, and parents receive access.

Platform (super-admin) users may be required to use multi-factor authentication.

You must notify us promptly at support@gograde.ai of suspected unauthorised access or security incidents.

4. Institutional responsibilities

Your institution remains the controller of student and academic data uploaded to GoGrade AI. You are responsible for:

Obtaining any required consents and lawful bases to process student, parent, and staff data.

Ensuring uploaded question papers, answer keys, rubrics, and answer sheets are accurate and authorised for use.

Reviewing AI-generated scores where educational or examination integrity requires human oversight.

Configuring roles, branches, academic years, and access permissions appropriately.

Complying with applicable education, examination, and data-protection laws in your jurisdiction.

5. AI evaluation and human oversight

GoGrade AI uses artificial intelligence (including third-party AI model providers) to recognise and evaluate answers. AI outputs are assistive. They may contain errors or inconsistencies.

Teachers and authorised reviewers can review, adjust, or override AI scores. Final academic decisions remain with your institution. You should not treat AI scores as the sole basis for high-stakes decisions without appropriate human review.

6. Credits, licences, and fees

Access to AI evaluation may consume institution-level credits or other usage units sold or allocated under a commercial arrangement with us. Seat limits, licence activation, trials, and credit top-ups may apply as agreed at provisioning or in a separate order form / quotation.

Prices, taxes (including GST where applicable), and payment terms are those stated in your quotation, invoice, payment link, or written agreement. Unless otherwise agreed in writing, fees are charged in INR.

7. Payments

We may collect payments using authorised payment partners, including Cashfree Payment Links (or other gateways we designate). Payment confirmation, credit allocation, and licensing may depend on successful settlement and our internal verification processes.

You agree to provide accurate payer details when completing a payment link. Failed, abandoned, or declined payments do not entitle you to Service usage beyond what has already been provisioned.

8. Acceptable use

You must not:

Misuse the Services to violate exam integrity, academic honesty policies, or applicable law.

Upload unlawful, infringing, harmful, or highly sensitive content beyond what the Services are designed to process.

Attempt to probe, disrupt, reverse engineer, or bypass security or tenancy isolation.

Share account access in a way that compromises student data confidentiality.

Use the Services to build a competing product through systematic scraping or extraction of proprietary models, prompts, or platform logic.

9. Intellectual property

We and our licensors own GoGrade AI, including software, branding, UI, documentation, and underlying systems. Your institution retains ownership of its content (question papers, rubrics, answer sheets, institutional data), subject to the licence needed for us to host, process, and evaluate that content to provide the Services.

Feedback you provide may be used to improve the Services without obligation to you.

10. Third-party services

The Services may rely on third parties such as cloud hosting/object storage, email delivery, analytics, AI model providers, and payment processors (for example, Cashfree). Their use is subject to their respective terms and our Privacy Policy.

11. Trials and changes to the Services

We may offer trials or limited evaluations. Trial features, duration, and credit grants may change. We may update, suspend, or discontinue features with reasonable notice where practicable, especially for material reductions affecting paying institutions.

12. Suspension and termination

We may suspend or terminate access for unpaid amounts, security risk, breach of these Terms, or as required by law. Institutions may stop using the Services subject to any committed commercial terms. Upon termination, access to institutional data follows our retention practices and any written offboarding arrangement.

13. Disclaimers

THE SERVICES ARE PROVIDED ON AN "AS IS" AND "AS AVAILABLE" BASIS TO THE MAXIMUM EXTENT PERMITTED BY LAW. WE DO NOT WARRANT THAT AI EVALUATION WILL BE ERROR-FREE, UNINTERRUPTED, OR SUITABLE FOR EVERY EXAMINATION CONTEXT WITHOUT HUMAN REVIEW.

14. Limitation of liability

To the maximum extent permitted by law, DevsTree IT Services Private Limited will not be liable for indirect, incidental, special, consequential, or punitive damages, or for loss of profits, data, goodwill, or examination outcomes. Our aggregate liability arising out of the Services is limited to the fees paid by the relevant institution to us for the Services in the three (3) months preceding the claim. Nothing in these Terms limits liability that cannot be limited under applicable law.

15. Indemnity

You agree to indemnify and hold us harmless from claims arising out of your content, your institution's misuse of the Services, or your violation of these Terms or applicable law, except to the extent caused by our wilful misconduct.

16. Governing law and disputes

These Terms are governed by the laws of India. Courts in Ahmedabad, Gujarat shall have exclusive jurisdiction, subject to any mandatory protections available to you under applicable law.

17. Changes to these Terms

We may update these Terms from time to time. Material updates will be posted on this page with a revised "Last updated" date. Continued use after the effective date constitutes acceptance of the updated Terms.
