AI-assisted grading tool

for schools and universities

Grade open-ended questions and provide personalised feedback in fraction of the time

Sign Up for Early Access

Features

Cut grading time in half

Our AI-accelerated innovative approach can speed up grading free-form answers so you can focus on teaching students.

Targeted feedback to students

Our AI-assistant helps you give students adequate feedback reflecting on their individual needs.

Standardised grading

Our AI-assistant helps you standardise grading across your team and across your courses.

Security from ground-up

Protect your students' sensitive information.

Integration to your LMS

Seamless integration to the most popular platforms allows you to start grading with a click of a button. Custom integrations available upon request.

Our service

Unlock digital assessment.

Assessment is hard but it needn't be. The dichotomy of scale or depth is over. Assign complex tasks that require analysis and application of knowledge at novel situations and data, deduction of new conclusions. Provide feedback and guidance on student work at the fraction of the time previously imaginable.

You can get started in minutes. We connect to your LMS and pull the answers to be graded. You start grading and our AI technology follows along and starts providing suggestions for scores and feedback instantly. You have full control over grading quality.

Furthermore, we make your assessment secured by

filtering out unauthentic responses

anonymising student responses for unbiased grading

Our adaptive and fast AI engine unlocks mastery learning at scale. Drive student achievement and satisfaction by providing timely feedback and guidance.

FAQ

Any Questions? Answered

Let's clarify some of your questions. If still in doubt, get in touch!

How can I use markr for my assignments?

Our system will integrate with your institutions Learning Management System (e.g. Canvas, Moodle, etc.) and you can mark any assignments from your course with a click of a button.

It is also possible to use markr as a standalone system. In this case, you can upload your assignments to our system and mark them there.

How long does it take to learn using markr?

Our customers usually start grading in 15 minutes.

Can markr help create questions?

Markr can also help you develop questions for your exams. From suggesting questions for certain topics and difficulty levels, it can also help you track which parts of the curriculum you have covered.

How does markr help me?

You start grading the assignments as you would normally do and markr learns how you grade. As grading goes on it learns to differentiate between the tiniest details and suggests accurate feedback based on your previous feedbacks. You can always modify these suggestions to make sure the feedback you send to the student lives up to your standards. This adaptivity is essential for being able to help in all situations, should it be an introductory or an advanced level course.

What kinds of questions can markr help with?

We believe quality assessment starts at free-form answers which are the specialty of markr. It analyses the student's free-form answer in context and reflects on any statements or arguments the student presents. It can even handle short essays.

Is markr just looking for keywords?

No. Our technology has surpassed the old-fashioned keyword checking paradigm. Markr understands the content of the text and thus can grade accurately even if the student phrases things differently but with identical meaning. Markr can also help grading inaccurate phrasing by pointing out shortcomings of the answer.
