## Data Privacy.

School and institutional data remains the intellectual property of the account holders. We don't use it to train our AI models. We use the relevant assessment and school context only to provide the service to that account. All data is de-identified and securely stored on Australian servers. Edexia is independently certified to ISO 27001 and SOC 2 Type II. For a plain-language walkthrough of those certificates and overseas transfers, including handwritten scans, see Certifications and Data Transfers.

## Privacy Policy

Last Updated: 30 March 2026

Your privacy is important to us and so is being transparent about how we collect, use, and share information about you. This Privacy Policy explains our privacy practices for the activities described herein. Please read this Privacy Policy carefully to learn how we collect, use, disclose, store, and handle your personal information when you access our website or use any of our Services. Any reference to “Edexia,” “we,” “us,” “our” or the “Company” is a reference to Edexia Pty Ltd (ACN 676 224 892). When you access our Website or use our Services you agree to the terms of this Privacy Policy.

Sometimes we will need to update our Privacy Policy so it may change from time to time. By continuing to use our Website or Services after we make any changes, you will be deemed to have accepted those changes, so it is important that you read this Privacy Policy in its entirety and check this Privacy Policy regularly for any updates.

## What is personal information?

‘Personal information’ is information we collect and hold which is identifiable as being about you.

This policy covers how we treat your information, including your personal information, that you provide when you access or use our services. Our services include Edexia, an assessment marking and feedback assistant for schools and teachers using artificial intelligence. We are not responsible for and our services don't extend to the services of any company we don't own or control, or people that we don't manage.

## Types of information we collect

So what types of personal information do we collect?

We collect personal information directly only when you provide it to us. The types of personal information we collect includes but is not limited to:

identifying information such as name;

contact information such as mobile phone number and email address;

your qualifications & study history including career preferences;

your teaching curriculum;

physical location;

IP addresses; and

nationality and work rights.

Any sensitive information you provide to us may be relevant to providing you with our services, and you acknowledge that we will use your sensitive information for this sole purpose. Your sensitive information will only be disclosed for another purpose where you would reasonably expect the sensitive information to be disclosed, and the disclosure is directly related to providing you with our services.

We may also collect personal information from you that you voluntarily disclose to us such as through surveys, responding to questionnaires or participating in other forms of research, which may include sensitive information.

It is important to note that, for users accessing our Services through a school, institution, or paid subscription, all data you provide or upload to our platform remains your property. We act solely as a processor of this information to provide you with our services. Different terms apply to free individual student accounts — please see the “Free Individual Student Accounts” section below for details.

## Cloud-based Data Storage and Management of Files

We use cloud-based data storage solutions for managing files uploaded by users to our services. These documents are stored on Amazon Web Services and Supabase, which help us organise data in a structured manner using parent folders. File names are solely used for storage purposes and are not processed or utilised in any other way.

Access to these documents is restricted to ensure that users can only access their own uploaded data. Users have the capability to delete their data safely and completely. Data fetching is conducted by the parent folder rather than by file name, which enhances data retrieval processes and security. The AI systems involved in managing these documents do not have knowledge of the file names; they only process the contents within the files.

## Ways of collecting information

How do we collect information?

We have different ways of collecting information. We collect your personal information directly from you, including when you:

access or use our Website;

subscribe to, purchase or use our Services;

use our Services as an authorised user (for example, as an employee of one of our customers who provided you with access to our services) where we act as a controller of your personal information;

sign up to receive marketing material including exclusive offers, promotions, or events;

participate in surveys, competitions, promotions or request information or material from us;

make inquiries about us or our Services or otherwise communicate with us by email, by telephone, in person, via the Website or otherwise; and

apply to work with us or are engaged by us.

We may collect personal information about you which may be provided to us by a teacher or staff member working at a particular school to which we provide our Services.

We may collect personal information about you from publicly available sources (such as the Internet) and from third parties (such as mutual contacts, or if someone makes a purchase on your behalf, or your referees provided during the recruitment process if you apply for a job with us).

Our websites and services may contain links to other websites, applications, platforms and services maintained by third parties. The information practices of these third parties, including the social media platforms that host our branded social media pages, are governed by their privacy statements, which you should review to better understand their privacy practices.

## How do you use cookies and analytics?

Certain information is collected automatically through your device, such as your computer address, computer type, operating system name and version, device manufacturer and model, language, Internet browser type and the websites you visit, including through cookies and analytics. We collect this information to analyse data, to track your experience on our Website and to improve the functionality and experience of Edexia products, services and our Website.

We use the following technologies to collect technical information and general analytics:

cookies – these are type of data files that are placed on your device and often include an anonymous unique identifier;

log files, which track actions occurring on our Website (which we collect anonymous data on and track); and

web beacons, tags, and pixels, which are electronic files used to record information about how you browse our Website.

By using our Website and our Services, you are consenting to the use of these technologies in accordance with this Privacy Policy.

## Can you choose not to disclose your personal information?

If you contact us to make a general enquiry about us or our business, you do not have to identify yourself or provide any personal information. You can also notify us that you wish to deal with us using a pseudonym.

Sometimes, if we are unable to collect personal information about you, we may not be able to provide you with the information or assistance you require. For example, we will not be able to send you information you have requested if you have not provided us with a valid email address or telephone number.

If you want, you can disable your web browser from accepting cookies and other technologies used to collect technical information and general analytics. If you do so, you can still access our Website, but it may impact your user experience.

## Dealing with us by pseudonym

You may elect to interact with Edexia using a pseudonym where doing so is lawful and reasonable. To request pseudonymous interaction:

Contact our Privacy Officer at admin@edexia.ai (or use the privacy request form on our website) and state: (a) the account or service affected; (b) the pseudonym you wish to use; and (c) the reasons for the request.

We will acknowledge the request and respond within our standard privacy request timeframes and confirm whether the request can be accepted and any limits or conditions.

Permitted scope

Where accepted, you may supply and display the agreed pseudonym in place of your legal name for general platform use, feedback, forum posts, and non-legal communications.

Pseudonymity does not remove any rights you hold under applicable privacy laws (access, correction, deletion).

When pseudonymity cannot be used or must be revoked We may require verified legal identity where necessary to:

comply with law or a court/tribunal order;

provision billing, invoicing or tax documentation;

fulfil a law enforcement request;

investigate fraud, security incidents or misuse;

perform safeguarding or child-protection obligations; or

otherwise where mandatory under applicable law.

If identity verification is required, we will notify you, explain the legal basis, and provide steps to complete verification. Where feasible we will seek the least intrusive verification method.

Internal linking and recordkeeping

If you request pseudonymity but also use services that require identity verification (for example, invoicing or regulated assessments), we may maintain an internal, securely stored linkage between your legal identity and your pseudonymous account solely for the purposes described above.

Any linkage data is treated as personal information, encrypted at rest, access-restricted to our Privacy Officer and authorised staff, and retained only as long as reasonably required by the purpose or law.

Rights and remedies

Choosing a pseudonym does not affect your ability to make access or correction requests, lodge complaints, or exercise other legal rights. If we decline a pseudonym request or require re-identification, we will provide reasons and review options.

Appeals and disputes

You may escalate a decision about your pseudonym request to our Privacy Officer. Unresolved disputes may be referred to the relevant privacy regulator.

## How we use and disclose information

How do we use your personal information?

In general, we use your personal information for purposes or legitimate interests connected with our business. We use your personal information strictly for the purposes of providing our Services to you. Specifically:

to enable the proper operation and functionality of our Services as requested by you or your organisation;

to verify your identity when you access our Services;

to communicate with you regarding our Services and to address any updates, issues or complaints;

to consider you for a job at Edexia (whether as an employee or contractor) or other relationships with us;

to meet our legal obligations related to providing our Services;

to contact you regarding the above, including via electronic messaging such as SMS and email, by mail, by phone or in any other lawful manner.

For schools, institutions, paid subscribers, and free teacher accounts, we want to emphasise that we do not use your data for any purposes beyond what is necessary to provide you with our platform and services. We do not train any artificial intelligence models on institutional or paid-subscriber data, nor do we use it for any purposes not directly related to your use of our Services. Different terms apply to free individual student accounts as described in the “Free Individual Student Accounts” section below.

## In what circumstances do we disclose personal information?

We will only use personal information about you if we have a lawful basis to do so, for example:

where you have given us your consent;

where processing of your personal information is necessary for the performance of a contract with you;

to meet our legal obligations; and

to pursue our legitimate business interests.

However, we will only use or disclose your personal information:

for the purposes for which we collected it (and related purposes which would be reasonably expected by you);

for other purposes to which you have consented; and

as otherwise authorised or required by law.

We may also use or disclose your personal information for our administrative, marketing (including direct marketing), planning, product or service development, quality control, survey and research purposes and for other purposes to which you have consented, or as otherwise permitted or required by law.

## Who do we disclose personal information to?

We may disclose your personal information to third parties in connection with the purposes described above. This may include disclosing your personal information to the following types of third parties:

our related companies;

our professional advisers (such as lawyers, accountants or auditors) and insurers;

our employees, contractors and third party service providers who assist us in performing our functions and activities, specified in the Subprocessor list e.g. payment systems operators and financial institutions, cloud service providers, data storage providers, shipping companies, telecommunications providers and IT support services providers;

third parties to whom you have authorised us to disclose your information (e.g. referees) as well as third parties who we engage to assist in providing the services; and

any other person as required or permitted by law.

We may also share anonymous or de-identified usage data with our service providers for the purpose of helping us in such analysis and improvements. Additionally, we may share such anonymous or de-identified usage data on an aggregate basis in the normal course of operating our business; for example, we may share information publicly to show trends about the general use of our Services.

Anyone using our online communities, forums, blogs, or communication features on our Website may read any personal information or other information you choose to submit and post.

If we disclose your personal information to third parties we will use our utmost efforts to ensure that such third parties only use your personal information as reasonably required for the purpose of disclosure and in a manner consistent with applicable laws. This may include for example (to the extent commercially practical) by including suitable privacy and confidentiality clauses in our agreement with a third party service provider to which we disclose your personal information.

## What about direct marketing communications?

We will only send you direct marketing communications (either through mail, SMS or email), including offers, any news and exclusive offers, promotions, or events, where you have consented to do so in accordance with applicable privacy and direct marketing laws in your region.

You may opt-out of receiving direct marketing communications at any time by contacting us or by using opt-out facilities provided in the direct marketing communications.

## International transfer of personal information

We store personal information in servers located in Australia as well as through third party service providers located overseas. You can read more information in our subprocessor list for specific details, however any information stored overseas is anonymised.

Where required under applicable privacy laws relevant to the transfer of personal information, we will take utmost effort steps to ensure that overseas recipients that we disclose personal information to have adequate safeguards in place. This may include assessing the privacy laws in the country where the information is disclosed or (to the extent reasonably practicable) putting in place contractual clauses with the third party service provider regarding data handling practices.

## How we manage information

How do we protect your personal information?

We have taken steps to secure and protect your personal information from misuse, loss, unauthorised access, modification or disclosure. We have implemented appropriate organisational and technical measures, which will be updated from time to time. Our Security Measures statement includes details such as our security framework, physical security, systems, data access and transmission and incident management.

While we have implemented appropriate organisational and technical measures, we cannot guarantee the security of transmission of personal information online. All personal information you share with us online is disclosed at your own risk.

Please notify us immediately if you become aware of any breach of security by contacting us as described in the “How to contact us” section below. You can also submit a complaint in line with the process outlined in the “How you can complain about a privacy issue” section below.

## How long do we keep your personal information?

We will keep your personal information only for as long as necessary to provide you with our Services, unless a longer retention period is required by law or specified in our retention policy. When you request deletion of your data, we ensure it is deleted completely from our systems, except where retention is necessary to comply with legal obligations, resolve disputes, or maintain security as specified in our retention policy.

## Your rights in relation to information

How can you seek to access and correct personal information we hold about you?

You may seek access, correct or update personal information we hold about you by contacting us as described in the “How to contact us” section below.

We will provide access to that information in accordance with applicable legal requirements. We may require that the person requesting access provide suitable identification and where permitted by law we may charge a fee for giving access to your personal information.

You may have additional rights depending on applicable privacy laws, which may include:

the right to request erasure of personal information we hold about you, for example if the personal information is no longer necessary to provide services to you;

the right to withdraw consent. You may withdraw your consent at any time where we relied on your consent to process your personal information;

the right to require us to stop using all or some of your personal information (for example, if we no longer have a legal right to keep using it) or to restrict our use of your personal information (for example, if you consider that the personal information we hold about you is inaccurate or if it is unlawfully held);

the right to data portability. In some circumstances you have the right to be provided with a copy of the personal information we hold about you in a structured, machine-readable and commonly used format; and

the right to require us to check with you before using or disclosing your personal information that it is accurate, up to date, complete and not misleading.

To avoid doubt, these additional rights will only apply to the extent required under the applicable privacy laws.

We may ask you to provide suitable identification when you seek to exercise any of these rights.

## Your rights relating to personal information

As the controller of the personal information you submit to our Services, you retain full ownership of your data. We process this information solely on your behalf and in accordance with your instructions as outlined in our agreement and this Privacy Policy.

## School, institutional, and paid-subscriber data ownership

Any school, educational institution, or organisation participating in a pilot programme or holding a paid subscription with Edexia retains full and exclusive ownership over all data submitted by or on behalf of that organisation and its students. This includes all student work, assessment data, feedback, and any other content uploaded or generated through the use of our Services. We will not use institutional or paid-subscriber data — including their students’ data — for model training, product development, or any purpose beyond delivering the Services to that organisation.

## Website demo submissions

If you submit content through the public Edexia website demo without creating or logging into an institutional, paid, or free teacher account, the following additional terms apply:

By submitting content through the public demo, you grant Edexia a non-exclusive, worldwide, royalty-free licence to use, reproduce, modify, process, and analyse that content for the purposes of operating the demo and improving, developing, and training our artificial intelligence models and related technologies.

We will take reasonable steps to de-identify and aggregate demo submission data before using it for training or improvement purposes, so that it is not personally attributable to you.

This licence does not affect your underlying intellectual property rights in the original work you create — you remain the author of your content.

If you do not want your content used for these purposes, do not submit it through the public demo and instead use an institutional, paid-subscriber, or free teacher account where the data-ownership protections described above apply.

## Free individual student accounts

If you sign up for a free individual student account that is not associated with a paying school, institution, or pilot programme, the following additional terms apply:

By creating a free individual student account and using our Services, you grant Edexia a non-exclusive, worldwide, royalty-free licence to use, reproduce, modify, and process the content you submit (such as essays, assignments, and other written work) for the purposes of improving, developing, and training our artificial intelligence models and related technologies.

We will take reasonable steps to de-identify and aggregate your data before using it for training purposes, so that it is not personally attributable to you.

This licence does not affect your underlying intellectual property rights in the original work you create — you remain the author of your content.

You may request deletion of your account and associated data at any time. Upon deletion, we will cease using your identifiable data for training purposes, although de-identified data that has already been incorporated into our models may persist.

If your free individual student account is later linked to a paying school or institution, the institutional data-ownership protections described above will apply from that point forward, and we will cease using your data for training purposes.

These terms apply exclusively to free individual student accounts. Free teacher accounts are not subject to these training-data terms and receive the same data-ownership protections as institutional and paid-subscriber accounts.

## How can you complain about a privacy issue?

You may make a privacy complaint in relation to personal information we hold about you by contacting us as described in the “How to contact us” section below.

If you make a privacy complaint, our Privacy Officer or another suitable staff member will investigate the matter and attempt to resolve it as soon as reasonably possible (usually within 30 days of receipt of your complaint).

If you believe your concerns have not been resolved satisfactorily by us, or you wish to obtain more information on privacy requirements you can contact your regulatory authority. This may be:

the Office of the Australian Information Commissioner on 1300 363 992 or visit their website at www.oaic.gov.au;

your local data protection authority: https://edpb.europa.eu/about-edpb/board/members_en;

the Office of the Privacy Commissioner (NZ): https://www.privacy.org.nz/; or

the Office of the Privacy Commissioner (Canada): https://www.priv.gc.ca/en/.

## Local exemptions and inconsistency with law

Where local laws allow for an exemption to compliance with certain legal obligations (for example, the employee records exemption in Australia), we may rely on such an exemption.

This Privacy Policy will not apply to the extent that it is inconsistent with any applicable law.

## How to contact us

If you have a query, concern or complaint about the manner in which your personal information has been collected or handled by us or would like to request access to or correction of the personal information we hold about you, please contact using the details provided below:

## Edexia Acceptable Use Policy (AUP)

Last Updated: 25 March 2025

## About Edexia

Edexia PTY LTD provides advanced educational assessment technology that assists teachers in evaluating student work through automated marking and feedback systems. Our platform is designed to enhance the educational assessment process while maintaining the crucial role of teachers in educational oversight and quality control.

## 1. Scope

This AUP applies to all users of Edexia's educational assessment products and services, including educational institutions, teachers, students, and any individuals accessing or utilizing our offerings.

## 2. Prohibited Activities

Users are strictly prohibited from employing any Edexia product or service under a Service Agreement to:

(a) violate any law or enable others to do so; (b) engage in harassment, intimidation, stalking, or abusive behavior; (c) cause damage to property; (d) inflict harm on any individual; (e) engage in deceptive practices; (f) facilitate any unlawful act; (g) breach or assist in breaching contractual obligations; (h) compromise confidential information; (i) mishandle personal, sensitive, or health information as defined by the Privacy Act 1988; (j) violate the Spam Act 2003, Spam Regulations 2004, or Internet Industry Spam Code of Practice; (k) manipulate or gain unauthorized access to our billing systems or network; (l) interfere with others' computers without consent; (m) expose minors to inappropriate content, including pornography; (n) distribute malicious software; (o) engage in identity concealment or spoofing in electronic messages; (p) disrupt the functioning of websites, forums, or online communities; (q) misuse remote systems without owner authorization; (r) operate services without proper safeguards against unauthorized use; (s) conduct unauthorized system probing or vulnerability scanning; (t) participate in or contribute to Denial of Service attacks; (u) transmit, display, or publish content that is: (i) obscene or offensive; (ii) defamatory or potentially defamatory; (iii) in violation of intellectual property rights; (iv) likely to incite hatred, violence, or discrimination.

## 3. Teacher Responsibilities

Teachers using Edexia's assessment and marking services have the following responsibilities regarding Edexia's AI-assisted marking and feedback technology:

(a) Submission Approval: Teachers are responsible for reviewing and approving all submissions processed through Edexia's platform to ensure they meet quality standards and educational requirements.

(b) Quality Assurance: Teachers must verify the accuracy and appropriateness of Edexia's AI-generated assessment outputs before sharing results with students or incorporating them into official academic records.

(c) Final Assessment Authority: Teachers maintain final authority over all assessments and may override, modify, or supplement Edexia's AI-suggested marks and feedback based on their professional judgment.

(d) Student Oversight: Teachers maintain full responsibility for addressing any issues, concerns, or disputes raised by students regarding assessments processed through Edexia's platform.

(e) Educational Integrity: Teachers must ensure that the use of Edexia's AI marking services complies with their institution's academic integrity policies and educational standards.

(f) Assessment Verification: Teachers are responsible for verifying that Edexia's AI assessment system has properly understood and evaluated student submissions according to the applicable marking criteria.

(g) Appropriate Usage: Teachers are responsible for ensuring that Edexia's services are used within the scope and parameters defined in their institution's service agreement.

## 4. Supplementary Terms

The prohibitions outlined in this AUP are supplementary to those specified in the Service Agreement between Edexia and the educational institution.

## 5. Anti-Spam Provisions

(a) Definition “Spam” refers to unsolicited commercial electronic messages with an Australian link as defined by the Spam Act 2003. Related terms are interpreted accordingly.

(b) Spam-Related Restrictions Users are prohibited from utilizing Edexia products or services to: (i) send, facilitate, or assist in sending Spam; (ii) use or distribute email address harvesting software; (iii) contravene the Spam Act 2003 or Spam Regulations 2004.

(c) Suspension Rights Edexia reserves the right to suspend services, in addition to other suspension rights, if: (i) the service is used to host any system facilitating unauthorized third-party email transmission; (ii) users violate clause 5(b), subject to reasonable attempts at prior notification and resolution.

(d) User Obligations Users must employ best efforts to secure their devices and networks against misuse, including: (i) installing and maintaining anti-virus software; (ii) implementing and updating firewall protection; (iii) applying necessary system and software updates and patches.

Edexia's right to suspend services applies regardless of whether violations occur intentionally, through misconfiguration, or via unauthorized means.

(e) Network Scanning Edexia may scan allocated IP ranges to detect misconfigured or open mail and proxy servers.

(f) Service Termination Services suspended under this policy may be terminated if issues remain unresolved after seven days. Pro-rated refunds for pre-paid services may be issued, less reasonable fees for costs incurred due to the suspension-causing conduct.

## 6. Edexia Platform Usage and Limitations

(a) Resource Utilization: Users must refrain from excessive or unreasonable consumption of Edexia platform resources, including but not limited to storage space, bandwidth, assessment quotas, and AI processing capacity.

(b) Assessment Quotas: Educational institutions are allocated specific assessment quotas based on their service agreement. Attempts to circumvent these quotas or process assessments beyond the agreed limits are strictly prohibited.

(c) AI Marking Limitations: Users acknowledge that Edexia's AI-assisted marking technology is designed to supplement, not replace, teacher evaluation. The platform provides initial assessment suggestions that must be reviewed and approved by qualified educators.

(d) Service Scope: The utilization of Edexia's services, particularly the AI marking functionality, must remain within the parameters defined in the educational institution's purchase agreement. Any usage beyond the scope of the agreed-upon terms is strictly prohibited.

(e) Compliance: Users are responsible for ensuring their usage aligns with both the resource limitations and the contractual boundaries established in their agreement with Edexia PTY LTD.

(f) Monitoring and Enforcement: Edexia reserves the right to monitor platform usage and service utilization to ensure compliance with these terms. Non-compliance may result in service restrictions or additional charges, as outlined in the user's service agreement.

## 7. Edexia Assessment Data & Privacy

(a) Student Assessment Data: Edexia treats all student assessment submissions, marking data, and feedback with the utmost confidentiality and in accordance with applicable privacy laws and educational regulations.

(b) Assessment Records: Edexia maintains secure records of assessment activities, including teacher reviews and modifications of AI-suggested marks, for quality assurance and accountability purposes.

(c) Compliance Requirements: All users must comply with relevant educational privacy standards, including but not limited to those established by educational authorities in their respective jurisdictions.

## Edexia AI Framework and Ethics Policy

### 1. Governance

Principles and Values

Edexia operates under the principles of fairness, transparency, accountability, safety, and human primacy. AI systems are designed to augment human judgment, not replace it. All models are developed and deployed with measurable commitments to accuracy and interpretability.

Roles and Responsibilities

End Users (educators, assessors): Retain decision authority and responsibility for applying AI outputs.

Operational Managers: Maintain compliance and risk monitoring.

AI Researchers: Validate datasets for bias and documentation integrity.

Developers: Ensure model behavior aligns with fairness and privacy standards.

Risk Management

Risks are classified as technical, ethical, or societal. Each model undergoes the following before deployment:

Security evaluation for model inversion and data exposure.

Accuracy Benchmarks using standardised evaluation metrics.

Bias assessment using statistical parity metrics.

### 2. Design and Development

Human-Centered Design

Edexia systems are designed to empower educators. Interfaces are built for interpretability and correction, not blind acceptance. AI feedback must always remain editable and reversible.

Data Management

All data sources are governed by the principles of minimization, consent, and localization.

Dataset composition is continuously reviewed to maintain demographic and contextual balance.

User data is never repurposed or shared externally.

Data used for training or evaluation is anonymized and audited.

Algorithmic Transparency and Explainability

Each AI output must be traceable to input data and decision logic. Models are documented through Model Cards detailing objectives, training data summaries, limitations, and confidence levels. All explanations are accessible in non-technical form to end users.

### 3. Testing and Deployment

Testing and Validation

Before release, every model must pass:

Stress testing (edge-case performance and safety). Results are documented and stored for audit.

Ethical validation (bias tolerance, fairness impact).

Functional validation (accuracy, reliability).

Monitoring and Auditing

All live systems are continuously monitored for drift, bias recurrence, and security breaches. Quarterly audits verify compliance with internal and external standards. Non-conformance triggers immediate suspension and review.

Human Oversight

Human authority supersedes AI outputs at all stages. All automated assessments must allow override and feedback logging. Critical decisions—academic, employment, or disciplinary—require human verification.

## 4. Communication and Stakeholder Engagement

Transparency with Users

Users are informed about:

Procedures for appeal or correction of AI outcomes.

Known limitations and confidence intervals.

Model purpose, data use, and boundaries.

All privacy terms and AI behaviors are disclosed in plain language.

Stakeholder Engagement

Edexia maintains structured consultation with educators, regulators, students, and ethicists. Policy revisions incorporate feedback from these groups. Cross-sector collaboration ensures alignment with emerging AI standards in education and assessment.

Summary

The Edexia AI Framework and Ethics Policy defines a closed-loop governance system: design informed by ethics, deployment bound by accountability, and monitoring guided by transparency. Every AI action must be explainable, correctable, and aligned with human educational purpose.

## AI Transparency Policy

Last Updated: 28 February 2026

Edexia ensures clarity, user control, and responsible deployment of Artificial Intelligence (AI) in its educational tools. This document outlines how our AI functions, what data it uses, its limitations, and how users are informed and given control over updates and model changes.

### 1. How Our AI Works

Edexia's AI assists educators by interpreting grading criteria and analyzing student submissions. It uses Anthropic's Claude to generate draft feedback and explanations.

Explanations are provided so users can see why feedback was generated.

The AI may optionally use web search to access up-to-date information.

Data sent to the model is de-identified for privacy.

### 2. Limitations

AI responses are not guaranteed to be correct or complete. Educators must review all output before using it.

On-screen disclaimers remind users to verify accuracy.

Edexia's AI is a support tool, not an autonomous grader.

The underlying model's knowledge base may contain biases or inaccuracies.

Results may vary due to incomplete context or input ambiguity.

### 3. Versioning and Updates

AI systems and features are versioned, labeled, and communicated clearly.

Notifications are issued for significant upgrades.

Silent model switches do not occur during use.

Current provider: Anthropic Claude.

New features are tagged as New or Beta.

### 4. User Control

Users may opt in or out of new AI models and functions.

Institutions may coordinate phased adoption directly with Edexia.

Opt-Out: To disable new models or revert versions, email admin@edexia.ai.

Opt-In: Experimental tools remain optional until stable.

### 5. Change Logs and Notifications

All major updates are documented and communicated.

In-app and email notifications announce major changes.

Users may request detailed history via admin@edexia.ai.

Change logs list AI and feature modifications.

## 6. Contact

Questions, feedback, opt-out requests, or changelog inquiries: admin@edexia.ai

Edexia deploys AI with transparency, explicit versioning, and user autonomy to ensure reliability and trust in educational settings.

## Certifications and Data Transfers

Last Updated: 17 August 2026

This page answers the two questions schools most often raise when reviewing Edexia's terms: what our ISO 27001 and SOC 2 Type II certifications mean, and whether de-identified student work, including handwritten scans, is ever sent overseas.

It is a plain-language walkthrough of claims already made in our Security Measures, Subprocessor List, and Privacy Policy. Those documents remain the legal source of truth.

## Formal certification, not informal alignment

Edexia is independently certified to ISO 27001 and SOC 2 Type II. An independent auditor has assessed our information security management system and operating controls against those standards and issued certificates. We also hold ST4S (Safer Technologies 4 Schools) accreditation.

That is different from language such as “supports”, “aligns with”, or “based on” a standard. Those phrases can mean a vendor follows some of the practices without holding a current certificate. We hold the certificates. Audit reports are available to schools on request via admin@edexia.ai.

Phrase | What it means | Edexia |

Supports / aligns with | Internal practices inspired by a standard. No independent certificate required. | Not our position |

Certified / holds | An independent auditor has issued a current certificate against the standard. | ISO 27001 and SOC 2 Type II |

## Identifiable data stays in Australia. De-identified text may travel.

Two different things get asked as one question. They have different answers.

Identifiable student information (names, IDs, and any other identifier) is stored on Australian servers and is not sent overseas.

De-identified assessment text may be processed by a small number of overseas subprocessors after identifiers have been stripped in Australia. The current list is in the Subprocessor List. GPTZero (AI writing detection, United States) is the example that receives de-identified student submissions.

De-identification runs on Edexia's self-hosted model in AWS Sydney before any external AI provider sees the work. Identifiers are replaced with a category placeholder so the assessment stays readable and gradeable without the underlying name or ID. Foundational language model providers (Anthropic Claude and Google Gemini) process that de-identified assessment text in Australia.

## Handwritten scanned work

A handwritten scan follows the same rule, with one extra step at the start.

The scan is stored on Australian servers (AWS Sydney / Supabase Sydney).

Transcription runs in Australia. The original scan stays there.

The resulting text is de-identified in Australia. A name written on the page is treated as an identifier and stripped at this step.

Only after that step can de-identified text be sent to an overseas subprocessor. Identifiable student information does not leave Australia.

So: de-identified information can be transmitted overseas. Identifiable information, including a name on a handwritten page, is not. The same de-identification step applies to typed work and to transcribed handwriting.

## Where to read more

Security Measures — technical and organisational controls, including the de-identification process.

Subprocessor List — each processor, location, and whether it may contain student personal information.

Privacy Policy — collection, use, and overseas disclosure.

# 07 | Data Retention Policy

## Data Retention Policy

Last Updated: 11 October 2024

## Overview

At Edexia, we are committed to safeguarding your personal information and retaining it for as long as it is necessary to fulfil the purposes for which it was collected, or as required by law, or for legitimate business interests.

## Data Classification

Edexia classifies data into various categories based on sensitivity, purpose, and retention requirements. These categories include:

Support and Interaction Data: Includes communications with support teams, chat logs, and user feedback.

Transaction Data: Includes payment information, billing records, and transaction history.

Educational Content: Includes classes, assessment batches, assessments, feedback, and other instructional materials.

Personal Identifiable Information (PII): Includes names, contact information, identification numbers, etc.

Each category of data is subject to specific handling procedures based on its classification.

## User Accounts (PII)

Edexia retains personal data for as long as necessary to ensure a seamless user experience and to fulfil the purposes for which it was collected. Users can delete their data safely and completely from within the application immediately. Should an organisation submit a formal request for data deletion, Edexia will maintain the data for an additional 12 months, strictly for record-keeping, legal compliance, and security purposes. Following this 12-month period, the data will be permanently deleted from our systems, unless a longer retention period is required by law.

## Assessment Data (Educational Content)

Edexia retains class and assessment data uploaded by the user for as long as it is needed to provide the Services or until the user deletes it. Users can safely and completely delete their assessment data manually from within the platform at any time.

## Transaction Data, Support, and Interaction Data

Edexia retains transaction data, including payment information and billing records, for as long as necessary to fulfil financial, legal, and auditing requirements. Support and interaction data, such as communications with support teams and chat logs, are retained to improve service quality, address user inquiries, and ensure a positive user experience. These data types will be maintained for the duration needed to fulfil these purposes and may be retained longer if required by law or for legitimate business needs.

## Data Handling Procedures

Edexia implements strict data handling procedures, including:

Regular Audits: We conduct regular audits of our data handling processes to ensure compliance with our policy and legal requirements.

Data Minimisation: We only collect and retain the minimum amount of data necessary for the intended purpose.

Access Controls: Access to data is restricted to authorised personnel based on their role and responsibility.

Data Encryption: All sensitive data is encrypted both in transit and at rest.

## Data Backup and Recovery

For disaster recovery and continuity purposes, Edexia maintains secure backups of all user data, including classes and assessments, for a period of 10 days and backups are updated weekly. These backups are encrypted and stored securely to protect against unauthorised access. In the event of accidental data loss or corruption, users may request the restoration of their data within this period.

## Legal and Compliance Obligations

Edexia may be required to retain certain user data beyond the standard retention periods to comply with legal or regulatory obligations, such as tax, auditing, or reporting requirements. In such cases, the data will be securely stored and only accessible to authorised personnel.

## Anonymisation of Data

Where possible, Edexia may anonymise user data that is no longer necessary for the provision of services. Anonymised data may be retained for longer periods for research, statistical analysis, and improving our services, as it no longer identifies individual users.

## Third-Party Data Sharing

Edexia may share data with third-party service providers who assist us in delivering our services. These providers are contractually obligated to handle data in compliance with our Data Retention Policy and applicable laws. Any data shared with third parties is subject to the same retention periods and security measures as data stored by Edexia.

## Data Subject Rights

Users have the right to request access to their personal data, correction of inaccurate information, or deletion of their data in accordance with applicable laws. Edexia will respond to such requests within a reasonable timeframe and will honour any legally valid request to delete data, subject to our legal and compliance obligations.

## Policy Updates

Edexia reserves the right to update this Data Retention Policy from time to time to reflect changes in legal requirements or our business practices. Users will be notified of significant changes via the application or email, and the updated policy will be made available on our website.

## Data Deletion Process

When a deletion request is received, Edexia follows a structured process to ensure that the data is permanently removed from our systems after the 12-month retention period. This process includes:

Verification: Confirming the authenticity of the deletion request and ensuring that the data is no longer needed for any legal, regulatory, or business purpose.

Secure Deletion: Permanently deleting data from all active systems and backups using industry-standard deletion methods.

Audit Trail: Maintaining a record of all deletion activities for audit and compliance purposes.

## User Notification

Edexia will notify users before their data is scheduled for deletion, providing an opportunity to export or duplicate the data if desired. This notification will be sent via email and through the application, ensuring users have ample time to take action.

## Rationale

Regular digital housekeeping is crucial for maintaining a streamlined, efficient, and cost-effective platform. By periodically reviewing and removing older courses and inactive user accounts, Edexia ensures easier navigation, improved performance, and reduced storage costs. We recognize that content created by educators and students is their intellectual property and should not be retained indefinitely, particularly when they are no longer associated with the platform.

This policy is designed to strike a balance between retaining necessary data for user convenience, legal compliance, and operational efficiency while respecting user privacy and data ownership rights.

# 08 | Terms

https://edexia.com/privacy/general-terms

Webpage text snapshot | Retrieved 10 October 2026

← Back to Privacy

## General Terms

Last Updated: 30 March 2026

### 1. Introduction

These General Terms apply to all services delivered by Edexia.

### 2. Interpretation

These General Terms and each Service Agreement incorporate the defined terms found in clause 42 of this document.

### 3. Service Agreements

(a) Unless otherwise agreed, a Service Agreement is formed when Edexia accepts a Service Order from you.

(b) A Service Agreement comprises:

Any Special Terms;

A Service Order;

A Statement of Work (if applicable); and

These General Terms.

(c) In case of inconsistency between documents in clause 3(b), the order of precedence of these documents shall apply.

### 4. Counterparts and Exchange

The Parties may enter into a Service Agreement by signing separate copies and exchanging them by post, in person, by fax, or email.

### 5. Charges and Payment

(a) You must pay all charges applicable to the services.

(b) Charges apply as specified in the Service Order or, where not specified, in accordance with the applicable rates schedule.

(c) Payments must be made by the due date on the invoice, without setoff or deduction.

(d) Overdue amounts will incur interest at the Default Rate, compounding monthly.

### 6. Billing Disputes

You may dispute a charge:

(a) Within 1 month after the date of the invoice; and

(b) In accordance with Edexia's dispute process in clause 31.

### 7. Relationship

Edexia operates as an independent contractor, and nothing in these General Terms or any Service Agreement creates a partnership, joint venture, or agency relationship between the parties.

## 8. Entire Agreement

The documents that make up a Service Agreement in clause 3 constitute the entire agreement between the parties, superseding all previous agreements, understandings, commitments, representations, and warranties relating to that subject matter.

## 9. Variation

A Service Agreement may only be varied by written agreement or electronic acceptance by both parties, including notifications through the Edexia platform.

## 10. Assignment

(a) Neither party may assign or novate a Service Agreement without the prior written consent of the other party, which will not be unreasonably withheld.

(b) Edexia may assign or novate a Service Agreement without your prior written consent if it sells or restructures any part of its business or shares.

## 11. No Waiver

Failure or delay by either party in exercising any right under the Service Agreement does not constitute a waiver of that right.

## 12. Notices

(a) Edexia may send notices via electronic messaging.

(b) Any other notices required under the Service Agreement must be in writing and sent to the relevant party's contact address.

## 13. Governing Law and Courts

These General Terms and any Service Agreement are governed by the laws of Victoria, Australia. The parties submit to the exclusive jurisdiction of the courts in Victoria.

## 14. Term of Service Agreements and Services

(a) A Service Agreement:

Starts on its Service Commencement Date;

Continues for the Contract Term, after which it automatically renews for successive 12-month terms unless terminated earlier in accordance with the Service Agreement.

(b) Upon renewal, the Service Agreement will be governed by the then-current terms as published on Edexia's website.

(c) If a Service Order's term ends before the Contract Term, the service will terminate automatically at the end of the Order Term unless otherwise agreed.

(d) If the Service Order includes Professional Services, those services will continue until completion.

## 15. Consents

You must promptly obtain any third-party consents necessary for Edexia to provide services, such as access to facilities for software installation.

## 16. Representatives

(a) Each party authorizes its representative to act on its behalf with respect to the Service Agreement, and the other party is entitled to rely on the representative's actions as if they were taken by the party itself.

(b) A party is deemed to know anything that its representative knows.

(c) A party may replace its representative by notifying the other party.

## 17. Service Commencement

Edexia will commence delivery of services on or within a reasonable time after:

(a) The date specified in the Service Agreement; or

(b) The expiry of 14 days from the date of the Service Agreement, whichever is later.

## 18. Service Standards

(a) Edexia will provide the services with due care and skill, in accordance with the applicable Service Agreement and laws.

(b) While Edexia endeavors to avoid interruptions, it does not guarantee error-free services and is not liable for interruptions caused by off-net events.

(c) Edexia will use reasonable efforts to schedule maintenance at times that minimize disruption.

## 19. Service Suspensions

Edexia may suspend services in whole or part:

(a) If required to comply with the law; (b) To protect people, property, or network integrity; (c) If credentials are compromised; (d) In case of emergencies; (e) For scheduled maintenance (with at least 3 days' notice); (f) If you or any authorized user breaches Edexia's Acceptable Use Policy; (g) If you cease carrying on business; (h) If you fail to provide security requested under clause 21 within 7 days; (i) If you do not cure a default within 14 days of receiving notice; (j) To investigate any potential breach of the Service Agreement; or (k) With your prior consent.

## 20. Price Variations

Edexia may vary charges:

(a) Upon expiry of the current contract term with at least 90 days' written notice;

(b) During the contract term if you request changes to the quantity or nature of the services.

## 21. Security

Edexia may require security, such as cash or a bank guarantee, if you experience an insolvency event, fail to pay an invoice by its due date, or following a credit review.

## 22. Other Obligations

22.1 You must:

(a) Comply with the terms of the Service Agreement; (b) Ensure services are not used contrary to law or in a way that causes a nuisance; (c) Comply with all applicable laws, including privacy laws; (d) Provide all necessary information and cooperation to Edexia for the purposes of the Service Agreement; (e) Follow Edexia's reasonable directions; (f) Maintain all permissions required for using the services; (g) Comply with Edexia's Acceptable Use Policy; (h) Respond promptly to Edexia's communications; (i) Not solicit Edexia's employees or contractors; and (j) Ensure your personnel do not breach the Service Agreement.

22.2 Edexia must:

(a) Comply with the terms of the Service Agreement; (b) Comply with all applicable laws, including privacy laws; (c) Provide you with appropriate information and cooperation as needed; (d) Maintain all permissions and licenses required for providing the services; (e) Respond promptly to your communications; and (f) Not solicit your employees or contractors.

## 23. Mutual Termination Rights

23.1 Neither party may terminate a Service Agreement: (a) During its contract term; or (b) Where the agreement relates solely to Professional Services, following the Service Commencement Date, except under clause 23.3 or by mutual agreement in writing.

23.2 Either party may terminate a Service Agreement by providing at least 90 days' notice prior to the expiry of the current contract term.

23.3 Either party may terminate a Service Agreement by written notice if: (a) The other party is in default and fails to remedy the default within 14 days of receiving notice; (b) The other party is subject to an insolvency event; or (c) The parties cannot agree on a change request related to Professional Services after following the agreed process.

## 24. Early Termination – Edexia

Edexia may terminate a Service Agreement by notice if:

(a) It becomes unfeasible to continue providing the service (Edexia will provide services for the contract term and give at least 6 months' notice of termination); (b) Edexia is acquired by a third party (Edexia will provide services for the contract term and give at least 6 months' notice of termination); (c) Edexia is required to do so by law or an authority; (d) You undergo a change of control without Edexia's consent; or (e) You request early termination, subject to an early termination charge.

## 25. Early Termination – You

You may terminate a Service Agreement by notice if:

(a) The service is subject to three or more critical incidents in a calendar month caused solely by Edexia (excluding scheduled maintenance).

## 26. GST

(a) Charges are exclusive of GST unless otherwise stated.

(b) Edexia may invoice, and you must pay, applicable GST in addition to the charges.

## 27. Confidentiality

Each party must keep the other's confidential information private, except for disclosures: (a) To its staff, contractors, and professional advisers who reasonably need to know it; (b) Authorized by the Service Agreement; or (c) Required by law.

The disclosing party must take reasonable steps to ensure that the information remains confidential.

## 28. Authorities

You authorize Edexia to: (a) Disclose information about you as required by law; (b) Handle personal information per Edexia's Privacy Policy and applicable privacy laws; and (c) Take any reasonable actions on your behalf necessary to provide the services.

## 29. Indemnities

29.1 You agree to indemnify Edexia against: (a) Any loss suffered by Edexia arising from your negligent or wrongful acts, or material breach of the Service Agreement; and (b) Any claim by you, your personnel, or a third party arising from your use of the services, including claims that the services infringe third-party IP rights, except to the extent the claim arises from Edexia's negligence or breach of the Service Agreement.

29.2 Edexia agrees to indemnify you against: (a) Any claim against you that the services infringe the IP rights of a third party, except where the claim is caused by your actions or breach of the Service Agreement.

29.3 Limitations on indemnity: (a) Your indemnity does not apply if you fail to provide Edexia with timely notice of a claim, fail to give Edexia sole control of the defense and settlement, or fail to provide reasonable assistance.

## 30. Liability

30.1 Non-excludable rights under Australian Consumer Law (ACL): (a) Nothing in these General Terms excludes or limits your rights as a consumer under the ACL or other applicable laws. (b) To the extent permitted by law, any representation, warranty, guarantee, or condition not explicitly stated in the Service Agreement is excluded. (c) If the ACL applies and permits, Edexia's liability is limited to resupplying the services or covering the cost of resupply.

30.2 Limitation of liability: (a) Except as provided in clause 25, your rights and remedies for failing to meet a service level target or breach are limited to service level credits as set out in the Edexia Service Level Agreement. (b) TO THE EXTENT PERMITTED BY LAW, NEITHER PARTY WILL BE LIABLE FOR ANY INDIRECT, INCIDENTAL, CONSEQUENTIAL, SPECIAL, OR PUNITIVE DAMAGES, INCLUDING LOST PROFITS OR REVENUE, BUSINESS INTERRUPTION, OR DATA LOSS, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. (c) The total aggregate liability of either party for any claims arising from a Service Agreement is capped at the amount paid by you under the Service Agreement for the relevant services in the preceding 12 months. This limitation applies regardless of the theory of liability and does not affect your payment obligations.

30.3 A party's liability under a Service Agreement will be reduced to the extent that the other party caused or contributed to the liability.

30.4 A party suffering a loss under a Service Agreement must take reasonable steps to avoid or minimize that loss.

## 31. Disputes

(a) Each party must appoint a senior officer to negotiate and resolve any dispute. (b) If negotiations fail within 14 days, the dispute may be referred to mediation before an independent mediator, with costs shared equally by the parties. (c) Despite a dispute, the parties must continue performing their obligations under the Service Agreement. (d) A party may seek urgent interlocutory relief from a court despite the dispute resolution process.

## 32. Force Majeure

Edexia is excused from its obligations under the Service Agreement to the extent that a force majeure event prevents or hinders service delivery.

## 33. Agents

Edexia may delegate its responsibilities to agents or subcontractors, but remains liable for their performance as if there were no delegation.

## 34. Reading Down

If any term of the Service Agreement is invalid, illegal, or unenforceable, it will be read down or severed to the extent necessary to make it enforceable. The remaining provisions will continue in full force and effect.

## 35. Commission, Rebates, and Out-of-Pocket Expenses

(a) Edexia may pay or receive commissions or rebates in connection with the Service Agreement. (b) You must pay all bank fees incurred in making payments to Edexia and any out-of-pocket expenses Edexia incurs in providing services, provided they exceed $500 and with your prior consent.

## 36. Obligations After Termination of Service Agreement

When a Service Agreement ends: (a) Edexia may invoice charges not previously invoiced. (b) You must pay all outstanding invoices by their due date. (c) You must return any Edexia property within 7 days. (d) Accrued rights and obligations survive, including clauses 5, 6, 13, 22.1(g)(i), 27, 28, 29, 31, 32, 36, 37, 40, and 41.

## 37. Policies

(a) You must comply with Edexia's Acceptable Use Policy and any other lawful directions. (b) Edexia will provide support per the Edexia Support Policy applicable to your product. (c) Edexia may amend or introduce new policies with 14 days' notice, and amendments will be made visible on Edexia's websites.

## 38. Security

(a) Edexia will implement security measures as set out in its Security Measures statement. (b) You must maintain the security and confidentiality of usernames and passwords. (c) You acknowledge that internet connections carry inherent security risks, and it is your responsibility to implement appropriate measures to protect your data. (d) Edexia agrees to comply with applicable privacy laws and promptly notify you of any data breaches.

## 39. Data

39.1 You retain ownership of your data.

39.2 Edexia will handle your data per the Privacy Policy and applicable laws.

39.3 Edexia may use de-identified, aggregate, and statistical information related to service performance, provided it does not identify you or your data. If you submit content through Edexia's public website demo, you acknowledge and agree that Edexia may also use that demo submission in accordance with the Privacy Policy, including to improve, develop, and train its artificial intelligence models and related technologies.

39.4 Upon termination, Edexia will return your data and delete remaining copies unless required by law to retain them.

## 40. Intellectual Property

(a) All intellectual property (IP) rights in Edexia and its services are owned by Edexia or its licensors. You must not infringe or commercialize these rights. (b) You retain ownership of your data, but Edexia owns any customizations, modifications, enhancements, and derivative works related to the services. (c) Edexia owns all trademarks associated with its services. You may not use any trademark without prior written consent from the owner. (d) You grant Edexia a license to use feedback provided by you or your end users to improve the services.

## 41. Third-Party Services

(a) Edexia may use third-party services to deliver its platform and will ensure compliance with relevant privacy laws. (b) If you integrate third-party services, you are responsible for assessing their security and privacy measures. (c) Edexia may disclose your data to third-party service providers as necessary to deliver the services. These are detailed in the Subprocessor List.

## 42. Dictionary

Acceptable Use Policy: Edexia's policy outlining acceptable uses of the services, accessible at Acceptable Use Policy, as amended from time to time.

Administrator: An individual authorized to use a service as an administrator, presenter, or support staff, identified through a unique login.

Affiliate: Any entity that directly or indirectly controls, is controlled by, or is under common control with the subject entity. “Control” refers to ownership of more than 50% of the voting interests of the subject entity.

Business Day: A day that is not a Saturday, Sunday, or public holiday observed in Victoria, Australia.

Business Hours: The hours between 9 AM and 5 PM AEST on a Business Day, adjusted for daylight savings.

Extended Business Hours: The hours between 8:30 AM and 6:00 PM AEST on a Business Day, adjusted for daylight savings.

Change of Control: In relation to a corporation, without Edexia's prior written consent, it refers to: a change in the ability to control or actual control of the corporation's management and policies; or a change in the relevant interest of more than 25% of the corporation's securities.

Charges: Any charge or fee applicable to services (exclusive of any taxes or withholdings unless otherwise stated).

Claim: Any claim, demand, action, proceeding, or legal process (including setoff, cross-claim, or counterclaim).

Confidential Information: All written or oral information identified as confidential or reasonably understood as such, including contract terms, network designs, customer lists, and other non-public information.

Contact Address: The postal or business address, fax number, email address, or other identifier most recently provided by a party as its address for communications.

Contract Term: The period specified in the Service Order, starting from the Contract Start Date and ending on the Contract End Date.

Customer: The entity or person specified in a Service Agreement.

Data Breach: Any incident involving Your Data that results in: corruption, inaccessibility, incorrect modification, or deletion of any part of the data; loss or misplacement of the data or storage device; unauthorized access to the data storage device or computer network; misuse, interference, corruption, unauthorized access, modification, or disclosure of Your Data; or a notifiable or eligible data breach under applicable Privacy Laws.

Default: A breach of these Terms or a Service Agreement, including non-payment of an invoice, for which a Default notice has been issued.

Default Rate: A rate 2% higher than the penalty rate under the Penalty Interest Rate Act 1983 (Vic), as adjusted from time to time.

DPA: The Data Processing Agreement between you and Edexia, if applicable.

Early Termination: Termination of a Service Agreement before the end of any Contract Term or Order Term, except where you terminate under clause 23.3.

Early Termination Charge: An amount representing a genuine pre-estimate of the loss suffered by Edexia due to early termination, considering discounts, outstanding disbursements, implementation costs, and stranded costs.

Electronic Messaging: Communication via email, fax, SMS, or MMS.

End User: An individual, such as a student, parent, teacher, employee, consultant, or contractor, who is authorized by the Customer to use Edexia services and has a user identification and password.

Force Majeure: An event or circumstance beyond a party's reasonable control, including war, riots, civil unrest, fire, flood, cyclone, typhoon, earthquake, lightning, explosion, strikes, energy shortages, pandemics, and government actions preventing performance under these terms.

General Terms: This document.

Insolvency Event: Occurrence of any of the following: for a corporation: an application for winding up, resolution for winding up, or deed of company arrangement; bankruptcy application for a natural person; appointment of a receiver, administrator, liquidator, trustee for creditors, or similar person over the person's assets; or the person is unable to pay their debts as they fall due.

Invoice: A statement of charges that have accrued or are payable in advance.

IP Rights: All industrial and intellectual property rights, including patents, copyrights, circuit layout rights, designs, trademarks, and domain names, as well as any applications or rights to apply for registration of these rights.

Law: Laws applicable to Edexia's provision of services in the jurisdiction where services are provided to the Customer.

Loss: Loss or damage suffered by a person arising out of a Service Agreement or any related supply, whether from contract, tort, breach of statutory duty, or otherwise, including obligations to indemnify or contribute to third-party losses.

Off-Net Events: Any event or circumstance occurring outside Edexia's network or involving third-party infrastructure.

Order Term: The period from the Order Start Date to the Order End Date for a specific service as set out in the Service Order.

Party: A party to a Service Agreement.

People: Management, employees, contractors, and agents of a Party, and anyone using or accessing a service on the Customer's account.

Personal Information: Any information or opinion about an identifiable individual, as defined in Edexia's Privacy Policy.

Plan Schedule: Descriptions of service plans, included features, usage guides, and policies, accessible via Edexia's websites.

Privacy Laws: Applicable privacy and data protection laws in the jurisdiction where services are provided.

Privacy Policy: Edexia's Privacy Policy, accessible at Privacy Policy, as updated from time to time.

Production Instance: The server where your hosted subscription service is installed and running as the live instance. Non-Production Instances are other installations, such as testing or staging environments.

Professional Services: The professional services specified in your Service Order.

Representative: A person authorized to represent a party.

Scheduled Maintenance: Planned maintenance, upgrades, or repairs to equipment, software, or networks used to deliver services, as part of Edexia's maintenance program.

Service: Any service provided by Edexia to you, as detailed in a Service Agreement.

Service Agreement: An agreement formed under clause 3 of these General Terms.

Service Commencement Date: The date when Edexia makes a service available for use, or a later date specified in the Service Agreement.

Service Order: An Order Form, Quote, or Estimate accepted by Edexia, detailing the services to be provided.

Special Terms: Any special terms and conditions agreed upon in writing in a Service Order or Statement of Work.

Third-Party Services: Products and services provided by third parties that you elect to use in connection with Edexia services, including those purchased through Edexia.

Your Data: Any data, content, text, messages, communications, code, video, images, or other materials uploaded, submitted, or transmitted by you, your administrators, or end users through the service, including personal information.

You and Your: Refers to the Customer.

We, Us, and Our: Refers to Edexia Pty Ltd (ACN 676 224 892).

Websites: Edexia's websites located at https://edexia.com and https://app.edexia.com.

## Security Measures

Last Updated: 17 August 2026

This document describes the organisation and technical measures implemented by Edexia Pty Ltd (Edexia) in order to protect personal data and ensure confidentiality, integrity and availability for the Edexia Software.

This document covers only the measures implemented by Edexia, where data is handled by sub-contractors or subprocessors we have separate agreements in place. Please refer to the Subprocessor List for detailed information about these providers and their terms of service.

From time to time Edexia may change these measures. This may mean that we replace existing measures with new measures or implement entirely new measures. The intent of these changes will never degrade overall security, but improve or evolve protocols to deal with new or emerging threats, changes to laws or regulations or adopting of new security standards.

Within this document, the following definitions apply:

“Customer” means any Licensee of the Edexia Software.

“Edexia Software” means the Edexia software products licensed by Edexia to the Customer pursuant to a Service Agreement.

“Personal Data” means any information provided or submitted by the Customer or Customer's authorised users in connection with use of the Edexia Software, in each case relating to any identified or identifiable natural person, that Edexia processes on behalf of Customer.

“Personnel” all Edexia employees (permanent, contract, casual, full-time and part-time), Edexia's contractors and any other people or organisations working for Edexia or on our behalf.

## De-identification Process

Edexia employs an advanced approach to protect sensitive information through a robust de-identification process. This process is designed to safeguard data privacy while enabling the use of the latest AI technologies.

Measures include:

Self-Hosted Foundational Model: Edexia has developed its own foundational model specifically for de-identifying sensitive data. This model is self-hosted and operates exclusively within our secure servers located in Australia through AWS.

Pre-Processing of Sensitive Data: All sensitive information is processed and de-identified by our foundational model before any interaction with external AI services. This ensures that no identifiable information leaves Australian servers.

Safety Guardrails: The de-identification process incorporates robust safety guardrails to prevent accidental exposure of sensitive information.

Data Privacy: Customer data is not used to train underlying foundation models. Customised models are accessed only by customers of Edexia, ensuring data privacy.

Encryption: All data is encrypted at rest using AWS Key Management Service (KMS). Data in transit is encrypted using TLS 1.2 (minimum).

Handwritten scans: Scanned handwritten work is stored and transcribed in Australia. The transcribed text is then de-identified in Australia before any overseas subprocessor can receive it. A name written on the page is treated as an identifier and stripped at that step. Identifiable student information is not sent overseas. De-identified assessment text may be. See Certifications and Data Transfers.

## Certifications

Edexia is independently certified to ISO 27001 and SOC 2 Type II. An independent auditor has assessed our information security management system and operating controls against those standards and issued certificates. This is formal certification, not informal alignment with those standards. Edexia also holds ST4S (Safer Technologies 4 Schools) accreditation. Audit reports are available to schools on request.

## Physical Security

To protect your data from physical access by unauthorised personnel. These measures cover data stored by Edexia and do not cover where the customer is self-hosting their own data.

Measures include:

Edexia utilises Amazon Web Services data centres and Supabase to store customer data.

Your data is hosted in the AWS Asia Pacific (Sydney) Region.

Edexia ensures all data is encrypted at rest to ensure that physical access would not allow access to the data.

## System Updates

To protect our systems from exploitation due to publicly known vulnerabilities we will ensure all our systems are running the latest security updates.

Measures Include:

Ensuring that all operating systems within the organisation are currently supported with security releases

We ensure that appropriate Personnel receive alerts and notifications from system software vendors and other sources of security advisories and install system software patches regularly and efficiently.

Review product dependencies every 6 months to ensure we are running the highest compatible versions and make appropriate changes to ensure we remain on supported versions.

We ensure all Personnel are running up to date software on their devices

We ensure all Personnel are running up to date anti-malware software on their devices.

## Data Access

In order to provide our customers with high quality support services, we may require access to customer data in order to help diagnose issues, provide training services and migrate data. We recognise that with this access we have a great deal of responsibility to protect the data that customers have entrusted to us.

Measures include:

Edexia has a policy that data will only be accessed on as needed basis, it will never be accessed for any other purposes other than to provide our services as requested.

Edexia has a policy that customer data will never be exfiltrated or moved from its primary location unless explicitly requested or authorised by the customer.

Our Personnel will never share Personal Data with unauthorised persons, only nominated people within your organisation can access Edexia support, and communicate with our Personnel.

Edexia may collect usage data regarding the system, but this data will always be anonymised and will have never include any identifiable information

## Data Transmission

When data is being transmitted across networks, specifically public networks like the internet, it is at risk of being intercepted, manipulated or stolen during transfer.

Measures include:

When transferring data over the internet we will utilise HTTPS TLS 1.2+ for web traffic and SSHv2 for all other traffic

If possible we will avoid sharing secrets and certificates. Where it is not possible secrets will be shared via one-time use only links.

## Development Process

Edexia implements administrative and technical controls to ensure that all code developed is designed, architected and delivered in the most secure ways possible.

Measures Include:

Edexia has a central repository of code that is only accessible to authorised Personnel. All code contributions to this repository must be reviewed by senior development engineers and pass multiple automated checks before it is authorised to be part of a release.

Edexia has automatic scanning of code dependencies and supply chain exploits and regularly updates packages.

The release process is fully automated and must pass a series of automated testing suites before passing. All releases require the supervision and approval of the CTO. Releases must first be delivered to staging environments and tested thoroughly before they can be deployed to production.

## Availability and Data Sovereignty

Edexia takes a number of steps to ensure your data remains protected from accidental destruction or loss. Edexia ensures that you have access to your data and that it can be exfiltrated from our systems if required.

Measures include:

The Personal Data you provide to Edexia remains your property, we do not claim ownership or control over your data. You are responsible for the data that you store in our systems, you must ensure that it does not infringe on the rights or privacy of any other parties, and it is held in accordance with relevant privacy legislation.

Edexia has business continuity plans in place to manage the risk of key Personnel and infrastructure incidents.

Edexia has made commitments to comply with all laws applicable to the provision of the services by us including applicable privacy laws

## Data Separation

Personal Data from one Customer is always logically separated from that of other Customers, as well as users managed by the customer (such as students).

Measures include:

File storage is logically separated for each customer.

Each Customer has their own unique secrets and credentials to ensure that their access cannot be used to access the database or files of other customers.

We use cloud-based data storage solutions for managing PDF documents uploaded by users to our services.

These documents are stored on Amazon Web Services and Supabase, which helps us organise data in a structured manner using parent folders.

File names are solely used for storage purposes and are not processed or utilised in any other way.

Access to these documents is restricted to ensure that users can only access their own uploaded data.

Users have the capability to safely and completely delete their data.

Data fetching is conducted by the parent folder rather than by file name, which enhances data retrieval processes.

The AI systems involved in managing these documents do not have knowledge of the file names; they only process the contents within the files, and this content is de-identified beforehand.

The infrastructure logs, metrics and usage data is centralised for the purposes of monitoring and observation. All logging data is anonymised.

If we provide access to data for the purposes of auditing to Customers we will ensure data provided is related to the requesting customer only.

## Incident Management

In the event of any security breach of Personal Data, the effect of the breach is minimised and the Customer is promptly informed.

Measures Include:

Edexia maintains a data breach response plan and a process for how to mitigate various types of incidents.

The usual notification periods for updates will be waived in the event of a serious security incident and updates may be deployed immediately to mitigate any further security incidents.

Edexia maintains detailed audit logs and ensures time is synchronised across systems to facilitate forensic examination.

In the event of a Data Breach where there is an expectation of harm, Edexia will notify affected Customers without undue delay after becoming aware of the Data Breach. This notification will occur via email, to the registered technical and key contacts.

When communicating a Data Breach we will include details of who is impacted, what is the potential impact and any steps we have taken to prevent further harm.

Where applicable Edexia will notify the relevant regulatory authorities to report the breach.

## Service Level Agreement

Last Updated: 28 February 2026

This Edexia Support Services Agreement (“Support Terms”) describes Edexia's support for current offerings and Edexia Services.

These Support Terms are governed by the Customer Terms and the applicable Order Form. Edexia may update or modify these Support Terms at any time in its sole discretion by posting a revised version here. Notwithstanding the foregoing, any updates or modifications to the Support Services will not materially diminish Edexia's responsibilities or your rights.

Capitalized terms not defined herein shall have the same meanings found in the Customer Terms agreed to by the parties or otherwise made available here: General Terms

Subject to payment of the applicable Fees and compliance with the applicable terms governing your use of the Edexia Services, Edexia will provide the following support services and Service Availability Commitment with respect to the Services (“Support Services”):

## 1. Service Level Commitment

Edexia must provide the following monthly uptime percentage to Customer (the “Service Level Commitment”), which can be found from the status page:

Service | Service Level Commitment |

Website | 99.9% |

Platform Operations | 99.5% |

Marking Operations | 99% |

## 1.1 Definitions

Incident: means an unexpected failure or degradation in the quality of the Services which is reported to Edexia by you.

Excluded Services: means: (a) Support for any issues resulting from third-party content or third-party software; (b) Support for any issues resulting from computer desktop/mobile device hardware and software or company network related issues including but not limited to Customer Equipment; (c) Support for any issue resulting from your failure to use the Services within specified guidelines and documentation.

Service Request or Enquiry: means a request made by you to Edexia to assist an End User with the functionality of the Edexia Service.

Response Times: means Edexia's response commitments as described in the Incident Priorities and Initial Response Times table in Section 1.6 below.

Service Restoration Target: means Edexia's targeted time commitment to restore services as outlined in the Incident Priorities and Initial Response Times table in Section 1.6 below. Service restoration may be a permanent fix or a temporary workaround to allow continued use of the Services.

## 1.2 Support Channels

Support requests can be raised through the following support channels:

Direct telephone – call the phone number of your point of contact.

Online ticket – create a ticket in the Edexia ticketing system through the application

## 1.3 Incident Priority Matrix

Priority 1 / Urgent

A critical error or emergency causing Edexia-hosted Service to be inaccessible by all users, including key functional components.

Examples include:

All Edexia-provided web applications are inaccessible;

Marking or criteria creation functionality is unusable.

Priority 2 / High

Key functional components of the Services are unavailable to a majority of users in a single portal, or a limited number of users across multiple portals.

Examples include:

Edit criteria or adjusting feedback style are faulty.

Unable to use a specific major feature that is not part of the core workflow (create class, mark assessment, download assessment).

Priority 3 / Normal

A disruption to a non-critical component of the Services, for a limited group of End Users.

Examples include:

Minor criteria refining and marking issues (that can be replicated).

Unable to use a specific non major feature that is not part of the core workflow (create class, mark assessment, download assessment).

Priority 4 / Low

Minor service disruption and/or general product and content feedback and support. If the issue does not meet any of the above criteria it will be categorized as a minor issue.

Examples include:

Platform design schema issues such as image dimensions, color, layout

Minor bug in a minor feature.

Different font types.

## 1.4 Your Obligations

You will designate one or more support contacts (administrators) that are authorized to engage Edexia Support Services and will provide commercially reasonable cooperation and information to Edexia with respect to the furnishing of Support Services.

## 1.5 Edexia Obligations

Edexia will use commercially reasonable efforts to respond to Incidents as set forth below in the Incident Priorities and Initial Response Times table to the extent such incidents are not the result of Excluded Services, all as reasonably determined by Edexia.

## 1.6 Incident Priorities and Initial Response Times

## 2. Service Availability Commitment

## 2.1 Definitions

Service Availability/Availability: means when Edexia indicates that you can access the Services on the production environment via the internet as a proportion of the total time available in the applicable calendar month for which Availability is being calculated (“Calendar Month”).

Business Day: means a 24-hour period determined by the date identified in the capital city of your location (as identified in the address in the Order Form or updated by notice from you to Edexia from time to time).

Business Hours: means between 8.00am and 8.00pm local time on Business Days.

Downtime: means the minutes during the Calendar Month when the Service is not Available to you, except any Excluded Minutes as outlined below.

Excluded Minutes: means the minutes that the Services are not Available caused by one or more of the following:

a) acts or omissions of you, your agents, employees, or contractors, or acts or modifications as directed or authorized by you, or breach of the terms of the Agreement that apply to the Services;

b) Your failure to adhere to Edexia's applicable specifications and guidelines, including hardware or software configuration necessary to meet minimum system requirements for the Services;

c) Unusually high usage volumes for which you and Edexia did not previously agree in writing to a process to allow Edexia to make accommodation for such increase in demand unless otherwise agreed to in an Order Form; or

d) third-party software, content, hardware, or services not provided or controlled by Edexia, including Customer Equipment, infrastructure, and internet links or events beyond Edexia's reasonable control, including but not limited to force majeure events, any law, regulation or order issued by the government, or any agency or department, which, in the reasonable opinion of Edexia, effectively prohibits or restricts Edexia from offering the Services, or imposes significant additional costs on Edexia to provide the Services, in the territory.

Maximum Uptime: means the total minutes in the Calendar Month (e.g. 44,640 minutes in the month of July) minus Maintenance Minutes during the same Calendar Month.

Maintenance Minutes: means the number of minutes elapsed during maintenance performed by Edexia that results in the Services not being Available as provided via status page.

Period of Exceptionally High Utilization: means a >50% increase in the number of logins processed by the Services above the normalized daily activity patterns (i.e., the greater of the average daily usage pattern for the prior 30-day period, excluding any Period of Exceptionally High Utilization, or the contracted activity volume).

Uptime Percentage: means the Maximum Uptime minus Scheduled Downtime and Unscheduled Maintenance and divided by Maximum Uptime.

## 2.2 Edexia Commitments

If during any Calendar Month of the applicable License Term, the Uptime Percentage for Services is lower than the Minimum Uptime Percentage, and you notify Edexia in writing (through your Customer Success Manager, as applicable) about such Downtime, Edexia shall:

investigate the underlying causes of the Downtime;

create a cause analysis of the Downtime;

create a plan which identifies the activities that Edexia will carry out to allow the Uptime Percentage to be achieved; and

implement the plan.

To the extent any plan identifies activities that you or your third-party vendors must carry out to allow the Uptime Percentages to be achieved, you must complete, or use reasonable efforts to ensure its vendors complete those activities in accordance with such plan.

## 2.3 Maintenance Services

During the Calendar Month, Edexia may from time to time (or as agreed to by the parties) perform schedule maintenance of the Services -including maintenance related to materials or equipment used for providing the Services- which may limit or disrupt access to the Services (“Scheduled Maintenance”). In addition, Edexia may in its sole discretion need to perform emergency or unscheduled maintenance from time to time (“Unscheduled Maintenance”). Edexia will use reasonable efforts to inform you in advance of such interruptions.

## 2.4 Escalations

For issues related to support services, please contact your Customer Success Manager.

# 11 | Subprocessor List

https://edexia.com/privacy/subprocessor-list

Webpage text snapshot | Retrieved 10 October 2026

← Back to Privacy

## Subprocessor list

Last Updated: 17 August 2026

A subprocessor is a third party data processor engaged by us who has or potentially will have access to or process Your Data (which may contain Personal Information as defined in our Privacy Policy).

Edexia requires any subprocessors who support delivery of Edexia services (see below) to satisfy equivalent obligations as those required from Edexia in its role (as a data processor).

As at the date of this document, the following is a list of the names and locations of Edexia's subprocessors in the production environment.

## Subprocessors who support delivery of Edexia Services

The processors below are used to support the Edexia Service.

Processor | Service provided | Subject matter | Entity Location | May Contain Student Personal Information |

Amazon Web Services | Cloud hosting and infrastructure | All Your Data, encrypted at rest | Sydney, Australia | Yes |

Supabase | Database and file storage | All Your Data, encrypted at rest | Sydney, Australia | Yes |

Anthropic (Claude) | Foundational language models | De-identified student assessments | Sydney, Australia | No |

Google (Gemini) | Foundational language models | De-identified student assessments | Sydney, Australia | No |

Sentry | Error monitoring | Application error logs | United States | No |

PostHog | Product analytics | Anonymous usage analytics | United States | No |

GPTZero | AI writing detection | De-identified student submissions | United States | No |

Vercel | Frontend application hosting and content delivery | Application hosting and request routing, no data stored at rest | United States | No |

Hatchet | Background job and workflow orchestration | Task orchestration metadata | United States | No |

Firecrawl | Web content retrieval | Public web content for resource ingestion | United States | No |

All student data is de-identified within our servers in Australia before being sent to any external AI provider, with safety guardrails and robust security measures. No identifiable student information is sent overseas, and our foundational language model providers process de-identified student assessments within Australia. De-identified assessment text may be processed by overseas subprocessors listed above. Handwritten scans are stored and transcribed in Australia, then de-identified, before any overseas processing. For a plain-language walkthrough, see Certifications and Data Transfers.

Our de-identification process is tested against a range of identifier categories, including personal names, specific locations, credit card numbers and identity document numbers. Identifiable information is replaced with a placeholder marking the category of the removed content, so the assessment remains readable and gradeable without the underlying identifier. For more details, see Security Measures.

## Subprocessors who support our internal operations

The subprocessors below provide services to support our internal teams (customer support and engagement, sales and marketing, accounts and billing, technical and professional services) with their processes and workflows in providing you the Services.

Processor | Service provided | Location |

Amazon Web Services | Cloud service provider | Australia |

Supabase | Database and storage provider | Australia |

Google (Google Workspace) | Email and productivity tools | Global |

Microsoft (Microsoft 365) | Productivity and communication tools | Global |

Zoom | Web conferencing | United States |

Github | Issue Tracking and Documentation | United States |

Slack | Communication tools | United States |

Linkedin | Marketing tools | Global |

X (formerly Twitter) | Marketing tools | Global |

## How to contact us

If you have a query, concern or complaint about the manner in which your personal information has been collected or handled by us, would like to request access to or correction of the personal information we hold about you, or if you would like us to let you know about future changes to our subprocessors, please contact using the details provided below:
